

Coverage of Trans-European Transport Networks (TEN-T) in mountain areas

TEN-T networks

Rail network

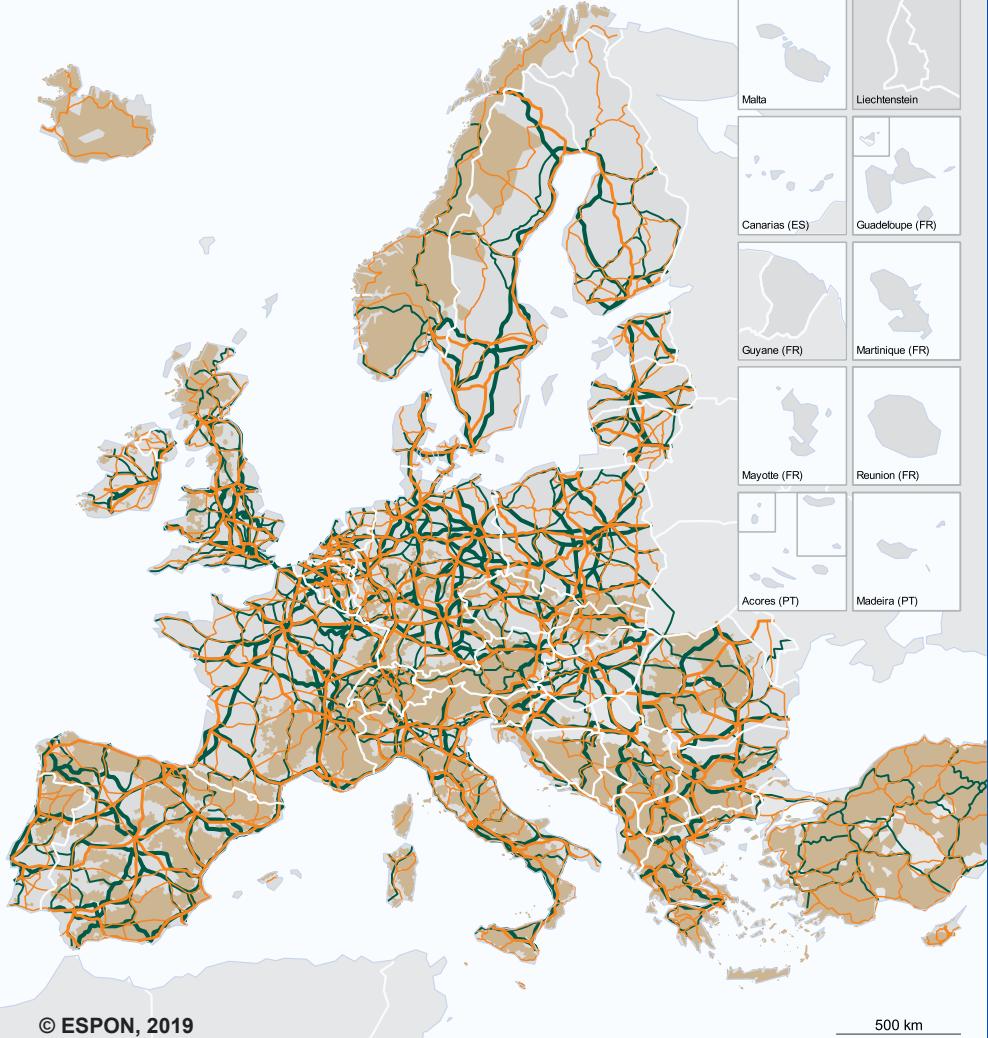

- core
- comprehensive

Road network

- core
- comprehensive

Mountain massifs

Note: The Trans-European Transport Network comprises two network 'layers': a) the Core Network which includes the most important connections, linking the most important nodes, and is to be completed by 2030; b) the Comprehensive Network which covers all European regions and is to be completed by 2050.
